

XXI Summer School “Francesco Turco” – Industrial Systems Engineering

Table of Contents

Session 1 - Smart Manufacturing & Enabling Technologies

Multi-disciplinary and multi-objective simulation framework to support Intelligent and Smart Manufacturing

Francesco Longo, Letizia Nicoletti, Antonio Padovano 1

Evaluation of technical and economic feasibility of additive manufacturing technology: evidences from a case study

Massimo Zanardini, Andrea Bacchetti, Federico Adrodegari 6

Cyber-Physical Systems in Manufacturing: Future trends and research priorities

Anna De Carolis, Marco Taisch, Giacomo Tavola 12

Additive Manufacturing applications within Food industry: an actual overview and future opportunities

Claudia Pinna, Lucia Ramundo, Francesco Giovanni Sisca, Cecilia Maria Angioletti, Marco Taisch, Sergio Terzi 18

Additive Manufacturing as an opportunity for supporting sustainability through implementation of circular economies

Cecilia Maria Angioletti, Francesco Giovanni Sisca, Rossella Luglietti, Marco Taisch, Roberto Rocca 25

Design and control of logistic process in an Italian Company: Opportunities and Challenges based on Industry 4.0 principles

Fabio De Felice, Antonella Petrillo, Federico Zomparelli 31

The role of Internet of Things (IoT) technologies for individualisation and service quality of a PSS

Claudio Sassanelli, Marco Seregni, Stephan Hankammer, Daniele Cerri, Sergio Terzi 36

New methodology for smart manufacturing research and education: the lab approach

Luca Fumagalli, Marco Macchi, Alessandro Pozzetti, Marco Taisch, Giacomo Tavola, Sergio Terzi 42

Adopting the Internet of Things technologies in Agriculture: an analysis of the benefits in the organic wine industry

Riccardo Mangiaracina, Giovanni Miragliotta, Alessandro Perego, Giulio Salvadori, Angela Tumino 48

Session 2 - Service Engineering

Non-core services efficiency improvement: how to find resources in the healthcare system

Ilaria Bendato, Lucia Cassettari, Marco Mosca, Roberto Mosca 54

Reducing dropouts from Higher Education Institutions through Lean Six Sigma: an exploratory study

Fabian Lacher, Alberto Portioli Staudacher 59

Proposal of an unconventional approach to assess polyvalence in lean organisations

Paolo Gaiardelli, Giinditta Pezzotta, Rossella Migliorati, Marzia Morgantini 65

Performance evaluation of commercial and experimental RFID UHF tags for transfusion medicine applications

Emanuela Melis, Francesco Zedda, Federico Sias, Ivan Luigi Spano, Gianluca Gatto, Alessandro Fanti, Giuseppe Mazzearella, Pier Francesco Orrù 70

XXI Summer School “Francesco Turco” – Industrial Systems Engineering

Table of Contents

PLM implementation and adoption features: from theory to practice in two high fashion companies <i>Elisa d'Avolio, Romeo Bandinelli, Rinaldo Rinaldi</i>	76
Evaluating technical efficiency and the effect of innovative healthcare delivery on Italian hospitals: A two stage DEA approach <i>Lorenzo Magherini, Emanuele Lettieri, Tommaso Agasisti</i>	81
A decision framework for upgrading ERP system <i>Luca Zeppetella, Elisa Gebennini, Andrea Grassi, Bianca Rimini</i>	87
Exploiting the Service Engineering Methodology to re-engineer Bergamo's bike sharing Product Service System <i>Alice Rondini, Alexandra Lagorio, Roberto Pinto, Giuditta Pezzotta</i>	92
Definition of a PSS Engineering Environment: from the Theoretical Methodology to the Platform Implementation <i>Giuditta Pezzotta, Roberto Sala, Fabiana Pirola, Ana Rita Campos, Antonio Margarito, Ana Teresa Correia, Sophia Fotia, Dimitris Mourtzis</i>	97

Session 3 - Environmental and Process Technology Issues

Techno-Economic analysis of a Membrane Filtration Process for the Phenolic Compound Extraction <i>Rosa Micale, Mario Enea, Antonio Giallanza, Giada La Scalia</i>	102
Autonomous energy-aware production systems control <i>Claudio Palasciano, Marco Taisch</i>	107
An international partnership for the sustainable development of Municipal Solid Waste Management in Guinea-Bissau, West Africa <i>Katia Ferrari, Streng Cerise, Rita Gamberini, Bianca Rimini, Francesco Lolli</i>	113
Innovative stand-alone biomass boiler characterized by low PM emission <i>Augusto Bianchini, Filippo Donini, Marco Pellegrini, Jessica Rossi, Cesare Saccani</i>	118
Natural Gas distribution system: overview of leak detection systems <i>Augusto Bianchini, Alessandro Guzzini, Marco Pellegrini, Cesare Saccani</i>	123
Life Cycle assessment of a sterile water generator circuit for bottling plants <i>David Mosna, Giuseppe Vignali, Alessandra Zamagni</i>	128
Fostering sustainable micro district heating: a tool for biomass boiler design <i>Gellio Ciotti, Antonella Meneghetti, Gioacchino Nardin, Patrizia Simeoni</i>	134
Contextualisation in Industrial Energy Symbiosis: design process for a knowledge repository <i>Maria Holgado, Miriam Benedetti, Steve Evans, Vito Introna</i>	139
A techno- economic analysis of Li-ion battery energy storage systems in support of PV distributed generation <i>Beatrice Marchi, Simone Zanoni, Marco Pasetti</i>	145

XXI Summer School “Francesco Turco” – Industrial Systems Engineering

Table of Contents

Session 4 - Business Processes Modelling, Optimization and Simulation

Synchro-push: a new production control paradigm <i>Marco Garetti, Marco Macchi, Alessandro Pozzetti, Luca Fumagalli, Elisa Negri</i>	150
RFid and eBIZ implementation in the Textile and Clothing Industry: evidence of a pilot project <i>Bianca Bindi, Romeo Bandinelli, Rinaldo Rinaldi</i>	156
System Dynamics limits and potentialities in the use of for production process simulation <i>Filippo De Carlo, Maria Antonietta Arleo</i>	161
Toward a scheduling model for the metal accessories' suppliers for the fashion industry <i>Virginia Fani, Romeo Bandinelli, Rinaldo Rinaldi</i>	166
Performance improvement of manual assembly lines in a context characterized by complexity <i>Violetta Giada Cannas, Rossella Pozzi, Margherita Pero, Tommaso Rossi</i>	171
Modelling a (MTO) Flow Shop in M-2-M production logic by System Dynamic matrix approach <i>Giuseppe Converso, Mario Di Nardo, Guido Guizzardi, Antonio Tufano</i>	176
Developing a new framework for Value Added Indicators enabled by RFID data in the fashion and apparel sector <i>Massimo Bertolini, Giovanni Romagnoli, Alexander Weinhard</i>	182
Benchmarking of RFID EPC and NFC tags for apparel applications <i>Massimo Bertolini, Giada Cilloni, Giovanni Romagnoli, Andrea Volpi</i>	187

Session 5 - Logistics & Supply Chain Management

Fashion luxury retail supply chain: determining target stock levels and lost sales probability <i>Giulia Lucci, Massimiliano M. Schiraldi, Martina Varisco</i>	192
Efficiency in the 3PL industry: a quantitative assessment of different approaches to achieve economies of scale <i>Gino Marchet, Marco Melacini, Sara Perotti, Chiara Sassi, Elena Tappia</i>	198
Assessing City Logistics projects: a business-oriented approach <i>Anna Corinna Cagliano, Alberto De Marco, Giulio Mangano, Giovanni Zenezini</i>	204
An adapted water wave optimization algorithm for routing order pickers in manual warehouses <i>Eleonora Bottani, Marta Rinaldi, Roberto Montanari, Teresa Murino, Piera Centobelli</i>	209
A comparison between Lean and Visibility approach in supply chain planning <i>Matteo Rossini, Alberto Portioli Staudacher</i>	215
Urban Distribution Centers: doomed to fail or optimal solutions for last mile deliveries? <i>Alexandra Lagorio, Roberto Pinto, Ruggero Golini</i>	220
Home Delivery vs Parcel Lockers: an economic and environmental assessment <i>Maria Giuffrida, Riccardo Mangiaracina, Alessandro Perego, Angela Tumino</i>	225

XXI Summer School “Francesco Turco” – Industrial Systems Engineering

Table of Contents

Strategic fit of the Italian supply chains: an experimental study <i>Antonio Rizzi, Giovanni Romagnoli</i>	231
Planning the reconfiguration of manufacturing systems: a literature review <i>Alessia Napoleone, Marco Macchi, Alessandro Pozzetti</i>	236
Session 6 - Sustainability, Industrial Safety, Risk and Maintenance Engineering	
A multi criteria decision making approach to support the risk management: a case study <i>Antonella Certa, Silvia Carpitella, Mario Enea, Rosa Micale</i>	242
An approach supporting Real-Time Project Management in Plant Building and the Construction Industry <i>Patrick Dallasega, Marco Frosolini, Dominik T. Matt</i>	247
Selection of Occupational Health and Safety Management Software using Analytic Hierarchy Process <i>Filippo Marciano, Paola Cocca, Elena Stefana, Marco Alberti</i>	252
The rise of platform economy: a framework to describe multisided platforms <i>Marco Ardolino, Nicola Saccani, Marco Perona</i>	257
Investigating sustainability as a performance dimension of a novel Manufacturing Value Modeling Methodology (MVMM): from sustainability business drivers to relevant metrics and performance indicators <i>Melissa Demartini, Ilenia Orlandi, Flavio Tonelli, Davide Anguita</i>	262
Firm’s characteristics and sustainability in the TCL industry <i>Filippo Emanuele Ciarapica, Barbara Resta, Stefano Dotti, Virginia Fani, Romeo Bandinelli, Rinaldo Rinaldi</i> ..	271
