Page 976. An error was found in the originally published version of Figure 3. The corrected figure is shown here.

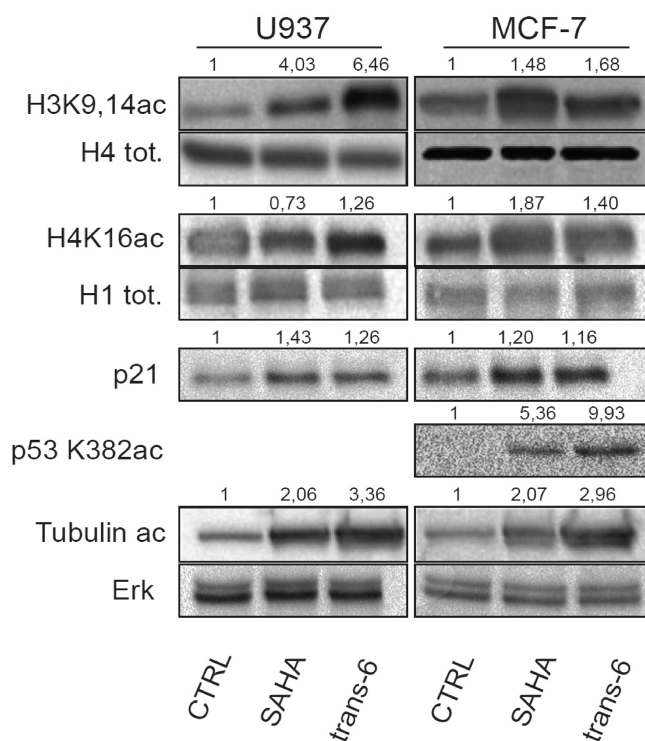

Figure 3. Western blot analyses carried out for the indicated targets in U937 and MCF-7 cells after 24 h of treatment. ImageJ was used to quantify protein expression. Histone H1, H4 and ERKs indicate equal loading. SAHA and *trans-6* were used at concentration of 5 μ M.
