

## **Acknowledgements**

At the first place I have to thank my tutor Dr. Paola Quatrini to give me the opportunity to work in this research topic and for her suggestions and supports during these long three years.

My thanks also go to Dr. Giuseppe Gallo, Ruggero La Rosa and Prof. A.M. Puglia, who kindly cooperated in the studies of proteomics. Everyone taught me research at the best.

I have to thank Dr. Claudio De Pasquale for her help with SPME GC-MS analysis.

Thanks also to the students who worked in our lab, specially: Valentina Imperato and Mariangela Tabone. They brought the right atmosphere to the lab.
