Desalination for the Environment Clean Water and Energy

22-26 May 2015, Marriott Park Hotel, Rome, Italy

CONTENTS

1	Assessment of sodium chloride, ammonium bicarbonate, and calcium chloride as inorganic-based draw solutions for forward osmosis desalination applications	1
2	Evaluation of a hybrid desalination process combining membrane technology and suspension melt crystallisation	2
3	Defluoridation of post treated photovoltaic wastewater using aluminum electrodes: optimization of operating parameters and sludge characteristics	3
4	Synthesis and determination of photocatalytic activity of CuFe_2O_4 powder on phenol degradation present in refinery wastewater	4
5	The efficacy of adsorptive removal of phenol from refinery wastewater using graphene	5
7	Application of nanofilter in removal of phosphate, fluoride and nitrite from groundwater	7
8	Freezing process – a new approach for nitrate removal	8
10	Studies on the synthesis and characterization of graphene Th(IV) phosphate composite cation exchanger and its application in the selective separation of lead metal ions	10
18	TiO_2 -photocatalyzed degradation of tetracycline: toxicity assessment	18
25	Characterizing the scouring efficiency of fluidized granular activated carbon (GAC) particles in membrane fouling mitigation via wavelet decomposition of accelerometer signals	25
27	Sizing and flow regulation of high pressure positive displacement pump for SWRO	27
32	Environmental effects of brine discharge from two desalination plants in Algeria (South Western Mediterranean)	32
36	Application of pseudo-emulsion hollow fiber strip dispersion system for the removal of propylparaben from the aqueous solutions	36
37	Anionic dye (RBA) removal using polymer inclusion membrane (CTA-TOA)	37
38	Evolution of the biolime enhanced osmotic pressure phenomenon and biofilm thickness during desalination of tertiary effluents and associated biofouling process	38
10	N. Galili, J. Gilron, M. Herzberg (Israel)	10

- 464 Treatment of synthetic dye wastewater by using Fe/CuO catalyst: Parametric and kinetic studies**
Y. Asci, M. Cam (Turkey)
- 465 The use of full factorial design for modeling the effects of process parameters on decolorization of Reactive Yellow 15 by using Fe/ZrO₂ catalyst**
Y. Asci, N. Ayas, E.A. Demirtas (Turkey)
- 467 Evaluation of the cost-effective high performance antiscalant 'ALBRIVAP® DSB (M) A' MSF units**
M. Matar, G. Pilati (Italy)
- 468 The study of non-linear kinetics and adsorption isotherm models for Acid Red 18 removal from aqueous solutions by magnetite nanoparticles and magnetite nanoparticles modified by sodium alginate**
S.Y. Hashemi, A.H. Mahvi (Iran)
- 469 Implementation of QA/QC program in research related to the membrane processes use in thermal water treatment**
E. Kmiecik, B. Tomaszewska, K. Wątor, M. Bodzek, M. Rajca, M. Tyszer (Poland)
- 471 Harmonic distortion mitigation technique in an industrial facility**
O. Sallangos, V. Daniel, I. Agathangelou (Cyprus)
- 472 Operational challenges of MN Limassol SWRO desalination plant in Cyprus**
C. Ram (Israel), E. Koutsakos (Cyprus), I. David, M. Priel (Israel)
- 473 Development of a mobile stand-alone solar driven reverse osmosis seawater desalination plant for sustainable development in Shalateen region, Egypt**
M.M. Abo El-Fadl, A.H.M. El-Aassar, A.A. Abdel Fatah, H.A. Shawky (Egypt)
- 475 New innovative solar tracking system for solar distillation system**
R. Mamlook (Oman), S. Nijmeh, S.M. Abdallah (Jordan), A. Aljumah, I.M.A. Arafat (Saudi Arabia)
- 477 Study and analysis of pure water and acrylamide in different food types using fuzzy logic**
R. Mamlook, A.S. Ibrahim (Oman)
- 478 Measuring adenosine triphosphate (ATP) and assimilable organic carbon (AOC) in seawater reverse osmosis (SWRO) feed water**
A. Abushaban, M.N. Mangal, S.G. Salinas-Rodriguez (The Netherlands), S. Mondal, S.A. Goueli (USA), J.C. Schippers, M.D. Kennedy (The Netherlands)
- 479 Towards a fair cost comparison for desalination methods: A review of the methodologies used and assessment of their strengths and weaknesses**
M. Papapetrou (Germany and Italy), A. Cipollina, U. La Commare, G. Micale (Italy), G. Zaragoza (Spain)
- 480 Artificial neural network modeling of vacuum membrane distillation for desalination**
S. Upadhyaya, K. Singh, J. Singh, R. Baghel, S.P. Chaurasia (India)
- 484 Two-pass closed circuit desalination for high-recovery (96%) low-energy production of quality permeates with saving of water and energy**
A. Efraty (Israel)
- 485 Thermal regeneration of ammonium bi-carbonate solutions for closed-loop reverse electrodialysis**
M. Bevacqua, G. Plano, P. Montesanto, A. Cipollina, A. Tamburini, G. Micale (Italy)
- 486 Water-organic systems in closed-loop reverse electrodialysis for lower regeneration requirements**
F. Giacalone, A. Cipollina, A. Tamburini, G. Micale (Italy)
- 487 Heat-transfer performance comparison between overlapped and woven spacers for membrane distillation**
L. Gurreri, A. Tamburini, A. Cipollina, G. Micale, M. Ciofalo (Italy)
- 488 Multi-physical modelling of reverse electrodialysis**
L. Gurreri, F. Santoro, G. Battaglia, A. Cipollina, A. Tamburini, G. Micale, M. Ciofalo (Italy)
- 489 Long-run operation of a reverse electrodialysis system fed with wastewater solutions**
J. Luque Di Salvo, A. Cosenza, A. Cipollina, A. Tamburini, G. Micale (Italy)

490	Experimental investigation on the efficiency of zinc(II) recovery from waste streams by TBP liquid-liquid extraction		287
491	Temperature-responsive cellulose-based hydrogels as draw agents in forward osmosis		288
492	Sustainable desalination for future water supplies		289
493	Efficiency of chlorine and alternative oxidants in seawater treatment for industrial cooling towers		290
494	Experimental investigation of a solar desalination with humidification and dehumidification using a rotating surface		290
495	Potential of using subsurface intake systems for SWRO systems along the Red Sea coastline of Saudi Arabia		291
496	Remineralization processes with micronized calcium carbonate providing superior water quality		292
497	Low-energy drinking water production and simultaneous wastewater treatment using microbial desalination cells: experimental results at lab scale		293
498	Removal of PAHs from municipal landfill leachate in an integrated membrane system		293
500	In search of impeccable remineralisation technology		294
501	Energy consumption study for PTFE and PVDF membrane in vacuum membrane distillation for desalination		295
502	Boudour seawater reverse osmosis desalination plant		296
503	Two step biological media filtration as pretreatment for municipal wastewater RO desalination		297
504	Adsorption studies of methylene blue dye using activated charcoal in continuous column		298
505	Environmental and economic assessment of fertilizer drawn forward osmosis and nanofiltration hybrid system for desalination of mine impaired water		298
507	Optimisation analysis of reverse electroanalysis systems for power production from concentrated brines		299
509	Influence of polyaniline water-soluble on the electrochemical and corrosion behaviors of lead-acid battery		300
510	Role of water transfers in addressing water stress in the region (Israel, Jordan and PA)		301
511	The potential to enhance membrane module design with 3D printing technology		301
512	Optimum production rate and flux for individual RO elements		302
