

XII Seminario Euro Latinoamericano de Sistemas de Ingeniería

(September 5-7, Lleida, Spain)

Welcome to the XII Seminario Euro Latino Americano de Sistemas de Ingeniería

(September 5-7, Lleida, Spain)

The purpose of the seminar is to bring together researchers, engineers and mathematicians to discuss recent advances in the development of methods and approaches for solving engineering problems. It will be also an important opportunity and an effective forum communication between research communities and industry because of interdisciplinary approach of the processes of preparation and decision making in engineering, the need in the decomposition of these interrelated processes under multiple criteria optimization, simulation and graphical representation of systems solutions. The event may also be useful to entrepreneurs interested in optimizing their work aided by mathematicians, engineers and specialists in complex systems.

Proposals for panels or demo presentations in special sessions are very welcome.

Details about the Participation, Program and Registration for this Conference are available in this Site (follow corresponding links: Call for Papers, Program & PC, Registration).

We thank you in advance for your participation and interest.
We look forward to seeing you in Lleida
