7 Introduction
12 Research group
15 1. Start Conference - Palermo
19 Programme
21 Dynamics of Peripherity
23 No More Masterplan: The Cityforming® Protocol
   Mauro Glisenti & Ziga Pucnik
29 The Construction of Alpine Building Culture
   Jorg Schmidhuber
37 The Smart Land Paradigm in the Sicani Territorial Archipelago
   Alvaro Corso
43 New methods and tools for analysis, design and branding of territories. A case study in the Elite Region.
   Walter Meiser
49 Streets of São Paulo
   Sarah Movsessian
53 Peripheries and metropolitan perspectives
   Bertha Luz
59 Urban-rural linkages: Resilience, complexity, transition
   Enrico Senatore
65 The green wedge: An urban design opportunity
   Ines Tomaszewski & Ehsan
67 Sicani "Some Railway Stations" projects: Sicilian inner land
disconnected railway regeneration
   Luca Teresa

INDEX

69 Temporary solutions for social regeneration of abandoned
   urban areas
   Francesca Sartori
71 2. Across Sicily - Excursion
73 Programme
75 EboliVina. Reform from its roots
   through art and architecture
   Giuliana Marzi
77 Agrigento. The Archaeological and Landscape Park
   "Valley of the Temples"
78 Favara urban regeneration, Farm Cultural Park
   Maurizio Cera
101 3. Favara - Research workshop
108 Programme
117 Favara 2050 - Explore the energy
   Sara De Gregorio, Rosaria Betti, Lina Abravanel, Flavio Menna Zappa
139 Inside out - (I) Reactivation of public interaction
   Lisa Finzi, Valentina Zeffirelli, Giovanni Mola, Sofia Naccia
159 Favara craft (II) Color it
   Morgan Alvaro, Cristiano Corradino, Max preservation
175 Path to network
   Dalia Cifarelli, Nina Hegyi, Sarah Meier, Ingrid Juckstock, Valentina Segreti
191 (II)Source it - (II) A source for Favara
   Laura Bormetti, Emma Holtz, Alberto La Mura, Giacomo Vescovi
210 Participants
ACROSS WEST SICILY - EXCURSION

73  Programme

75  Gibellina
Aduls from 3’s with through art
and architecture
Lionel Morrauto

77  Agrigento
The Archeological and Landscape Park
"Valley of the Temples"

79  Favara urban regeneration,
armed cultural part
Massimo Caru

Gibellina (from the Arabic ghebel, mountain) is a small town in central Sicily, in the former Province of Trapani, destroyed by the earthquake in the Belice Valley in 1968. The new town "Gibellina Nuova" was rebuilt 18 km from the old one, in a rural area near the town station of Sferrac. The Salci (Institute for Social Building Development) drew up the general plan on the example of the "garden town." The new settlement was related to the urban local tradition and to the agricultural patterns of the site. In 1974, when the residences were ready but the faciliites had still to be made, the Mayor Corosca called many of the most prominent artists and architects to "Artista- (il)" the town. Even though the final result is a collection of different art and architectural pieces, with little relation to each other, Gibellina is the most known rebuilt town of the Belice Valley. Its inhabitants recognize the identity that art and architecture assumed and strengthened. The city's core is the Civic Center with the Town Hall by the group led by G. Samengo, the Main Church by L. Guarnelli, Palazzo di Lecce by F. Vernetto, residences by G. M. Signorini, by F. Missoni, and by F. Perini and L. Themis, and squares by F. Perini and L. Themis.

The town, large about 150 ha, is an open-air museum with more than fifty works of art spread in it: a sculpture for each road, mural, art installations, and pieces from the artists.

Urban regeneration and impulses for local development in new constellations of peripheries and centres are in the focus of „Dynamics of Periphery“. What are research, practice, design, and planning contributions to successful initiatives and models in small cities? How are they linked with innovative models of urban design, architecture, re-cycle and artistic creativity? How can sustainable use of territorial capital, concepts of social innovation, and governance improvements enhance creative dynamics of specific assets and spatial characteristics?

In a research project between the University of Palermo and Leibniz Universität Hannover, „Dynamics of Periphery“ have been discussed in a start conference in Palermo. The conceptual approaches collected in this book are combined with a project report of a workshop in Favara with master students of both universities; in collaboration with the municipality of Favara and with FARM Cultural Park Favara. The project „Dynamics of Periphery“ is funded in the University Dialogue Programme Southern Europe of DAAD. The transversal research between architecture, urban design, arts, local and regional development highlights the need and the potential of new ways to integrate „Dynamics of Periphery“ in debates and policies about futures of habitat in Europe.
